

## BRON Ltd. Senior Civil Engineer

### Company:

BRON Ltd. (BRON) is an innovative and progressive multinational, interdisciplinary development consulting group of technical and business professionals. BRON Business Center for innovation is based in Nassau, The Bahamas, with additional offices in Florida, Turks & Caicos Islands and St. Kitts.

### Job Summary:

BRON seeks a highly capable Senior Civil Engineer to manage our Civil Discipline. The Senior Civil Engineer will be responsible for supervising the civil design and construction quality control teams, allocating resources, strategic planning, and project management.

### Job Duties:

The duties include but are not limited to the below tasks:

- Manage a team of Engineers and Technicians and provide team leadership, mentorship, and training.
- Participate in Strategic Planning, prepare discipline annual budgets and recruit new team members.
- Prepare proposals for a variety of civil projects and negotiate agreements with clients.
- Perform and coordinate the preparation of engineering designs for roads, water, and sanitary sewer projects from conceptual design through permit and construction phase. An intimate knowledge of the civil design process using CAD software is important.
- Coordinate projects with clients, contractors, outside consultants, and team members.
- Prepare engineering reports, plans, engineering cost estimates and specifications to a high degree of professionalism.
- Review civil design, calculations and construction documents prepared by others and provide feedback for completion of the work to a high standard.
- Stamp and sign engineering designs and reports for issue to the relevant Bahamian Approval Agency.
- Resolve a variety of complex problems (e.g., conflicting design requirements, unsuitability of conventional materials, difficult coordination requirements). Communicate and interact with projects team members, client representatives, review agencies and others as appropriate to project.
- Support construction administration personnel as needed with site instructions, RFI responses etc.
- Inspect and coordinate inspections of completed projects to ensure that all codes have been met, safety issues addressed, and that the job has met all specifications.

As a BRON team member you will be expected to seek continual training and upgrading consistent with the objectives and direction of the company.

### Qualifications:

- Candidate shall have professional registration as either PE, P.Eng., MICE, with 5 years of post-professional registration experience.
- Candidate shall have 10 years minimum experience in consulting engineering practice with similar progressing duties and responsibilities. Proven leadership skills and experience.
- Experience in performing civil engineering design and analysis is mandatory. Candidate should be proficient in AutoCAD, Civil 3D, Word, Excel, Project and other related software.

**Salary:** Commensurate with qualifications and experience.

**To Apply:** Please email [possibilities@bebron.com](mailto:possibilities@bebron.com) with your CV and references.
